

## **IBDL Experiential E-Learning**

As Confucius once said, “I hear and I forget. I see and I remember. I do and I understand.” That’s the main base on which the experiential leaning was built. To put it in simple words, experiential learning is learning by doing’. It’s one of the most fundamental, intuitive ways to learn. Any time anyone of us does something that they have never done before and then think about how it worked and why, they are using experiential learning. Unsurprisingly then, experiential learning has long been held in high esteem as a method of formal learning.

### **How Does Experiential E-Learning Work?**

The phrase ‘Experiential e-Learning’ means modelling realistic, life-like, authentic learning experiences with the use of online technology. It encompasses many different aspects of e-Learning, such as computer-based training and classroom-based technology applications. Online-based training applications – such as Scenarios and Simulations, Just-In-Time, Face-To-Face Simulations, Conversation Aids, Learning Games Experiential learning can be incorporated into traditional computer-based training content, in the form of learning designs such as scenarios, simulations and serious games.

IBDL has been one of the pioneering entities in providing experiential e-Learning for all its qualifications. Built with the groundbreaking software system, iSpring Suite 8, IBDL’s e-learning aims to present a more interesting and easy way of learning than the traditional ones. IBDL’s experiential e-Learning model is built on strong foundations of educational theory and practice, brought up-to-date with the most recent e-Learning advances.
